OHS - Workplace Safety & Mitigating Occupational Health and Safety

PIK-0525 UK-LDN-1

**If you can't train them,
you can't blame them!**

Short Description:

The Occupational Health and Safety training program is designed to provide participants with essential knowledge and skills aimed at enhancing workplace safety and mitigating occupational hazards. This program encompasses a comprehensive curriculum that covers the identification of potential risks, the implementation of effective safety measures, and the importance of adhering to regulatory standards. By engaging in this training, participants develop a deeper understanding of safety protocols and best practices, which are crucial for creating a secure working environment. Furthermore, the program emphasises the significance of fostering a culture of safety within organisations. Participants are encouraged to advocate for safety initiatives and collaborate with colleagues to promote awareness and compliance. This collaborative approach not only aids in the prevention of workplace accidents but also contributes to overall employee well-being and productivity. Ultimately, the training equips individuals to take proactive steps in ensuring a safer workplace for themselves and their peers.

Course Overview:

PROGRAM OBJECTIVES

- Effectively manage health and safety in the workplace.
- Identify and control common workplace hazards.
- Measure success in health and safety initiatives.
- Understand key international standards related to health and safety.
- Investigate accidents to determine causes and recommend preventative measures.
- Explain the impact of human and organisational factors on health and safety.
- Develop strategies for continuous improvement in health and safety practices.

TARGET AUDIENCE

- Managers responsible for overseeing health and safety protocols.
