Advanced Project Management.

PIK244-0425 PRS-1

**If you can't train them,
you can't blame them!**

Short Description:

Develop a solid foundation of project management tools and techniques with this comprehensive level 2 program. Discover a wealth of valuable, flexible and easy to use tools and techniques that you can use immediately to help ensure the success of an in depth project-project in your organisation. This program covers the entire project life cycle as it incorporates practices that are critical to project success.

Course Overview:

Objectives:

- Set-up and manage projects effectively.
- Scope out the objectives and deliverables for a project.
- Create a project plan.
- Calculate the resources required for a project.
- Manage teams effectively.
- Develop contingency plans.
- Project stakeholders' management.
-

Who should attend?

- Managers and Directors in Project Management.
- Technical and engineering staff in Project-Management field.
- Procurement and contract management personnel.

Methodology:

Participants will learn by active participation throughout the programme through the use of program materials, exercises, questionnaires, training videos and discussion of “real life” issues in their organisations. This approach yields a comprehensive project management experience that can immediately be applied to your job.
